# Your trusted industry partner to connect the US Federal government to the Indo-Pacific region
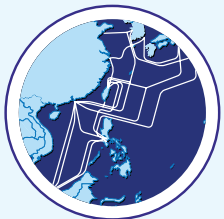

Telstra

INDOPACOM

Telstra has the largest subsea cable network in the Indo-Pacific region, offering network diversity, flexibility, and resiliency.

Pacific Ocean

CONUS

Telstra combines our leading satellite and subsea cable infrastructure with a dedicated US Federal team in Washington, D.C. and Virginia, offering decades of government connectivity experience.

Telstra is the trusted partner for systems integrators, carriers, and government agencies providing services and support from the United States to Hawaii, Guam, and the Indo-Pacific Command AOR. Telstra is Australia's leading telecom company with more than 70 years' experience connecting Australia to the world. Australia is a key member of the Five Eyes intelligence organization and Telstra is the provider of global network services to the Australian defense forces, so your federal customer can trust our performance, security, and reliability.

Telstra owns and operates the largest subsea cable network in INDOPACOM, spanning more than 250,000 miles and serving up to a third of the region's IP traffic.

Access more than
2,000 PoPs
in more than 200 countries and territories.

We've operated internationally for more than 70 years, and over 25 years in the United States. When it comes to the Indo-Pacific region, you can trust Telstra.

Your trusted industry partner to connect the US Federal government to the Indo-Pacific region

Telstra

Telstra brings together a world-class global network, long-standing government experience, and in-country expertise.

The cornerstone of our capabilities are our high performance, trustworthy, secure, and resilient network services. Our network includes satellite teleports flanking the east and west coasts of Australia, our vast domestic terrestrial network in Australia, and our 250,000-mile subsea network spanning the Pacific. Together, it means you get the expertise, reach, and performance to empower and support your Mission requirements wherever they may be in INDOPACOM.

Your partner to co-create US Federal customer solutions.

- Telstra offers access to Australia's leading domestic and international network, including teleports in Perth and Sydney connecting to the Indo-Pacific region's most robust, diverse, high-performance subsea network.

- We work in partnership to focus on outcomes, whether you're looking for simple connections to diverse routes or an end-to-end, space to terrestrial connectivity solution.

Telstra makes it easy for SIs to connect US Federal Missions to and from the INDOPACOM AOR.

- Our dedicated US Federal government team combines decades of experience with our leading global network.

- We securely connect key Australian government departments including the Department of Defence, the Department of Foreign Affairs and Trade, and the Australian Embassy in Washington DC.

As an Australian business, we empower you with cultural, economic, military and political alignment.

- Australia is a key member of the Five Eyes intelligence alliance.

- Australia and the US have a longstanding security alliance.

- Telstra was integral to bringing images of Apollo 11 astronauts walking on the moon more than 50 years ago.
