Managed Security Service Edge (SSE)

The expansion of cloud services and remote working has created complex, distributed networks for businesses. This makes it difficult to efficiently safeguard data and assets.

The challenge is compounded by a rapidly evolving cyber threat landscape. New "Gen V" attacks, traditional defense failures due to exploited supply chain vulnerabilities, insider threats, stricter regulations, and surging malware necessitate a new approach to security.

Telstra Managed Security Service Edge (SSE) can help address these challenges by converging security capabilities into a single cloud platform to simplify operations and proactively safeguard your business with advanced threat intelligence and the expertise of our security specialists.

Telstra Managed SSE Capabilities

Next Gen Secure Web Gateway (NG SWG)	**Zero Trust Network Access (ZTNA)**	**Cloud Firewall**	**Data Leak Prevention (DLP)**
Cloud Access Security Broker (CASB)	**Advanced Threat Protection**	**Cloud / SaaS Security Posture Management**	**Threat Intelligence**

What we'll do

Logical and pragmatic approach to solution adoption and deployment, helping your business to navigate the complexities of security.

End-to-end solutioning that grows as your business does. Understand your security needs and design tailored services, managed by our experts.

Provide clear visibility of your solution functions and any risks we might encounter along the way.

Contextually-mapped and strategically-built around your specific threat profile to enable swift identification and resolution.

Business is everywhere. Security should be too.

Your business needs to be secure.

To help you achieve this, Telstra International offers multi-layered, modular security services designed to meet confidentiality, integrity and availability.

Our deep experience and expertise empower you to navigate the complexities of the digital business landscape and help develop a comprehensive cybersecurity strategy to address your critical business priorities.

Our experts can help optimise your security posture to protect your business from cyberattacks, satisfy industry compliance, as well as customer and shareholder requirements.

Why Telstra International?

Expertise and Experience
Our deep experience and knowledge of security frameworks such as NIST, GDPR and SOC 2 enable us in implementing robust and effective solutions that align with your industry, compliance requirements, and risk management objectives.

Strong Alliance Ecosystem
We bring the strengths of our partner alliances with global technology leaders in our ecosystem to support you.

Proven Consulting Methodology
Our Telstra Purple "4D" Consulting Methodology has helped many global customers to strengthen their security posture.

ISO/IEC 27001 Certified
Our technology, delivery and support processes are certified to the ISO 27001 Information Security Management standard.
