

Purple Asia Overview

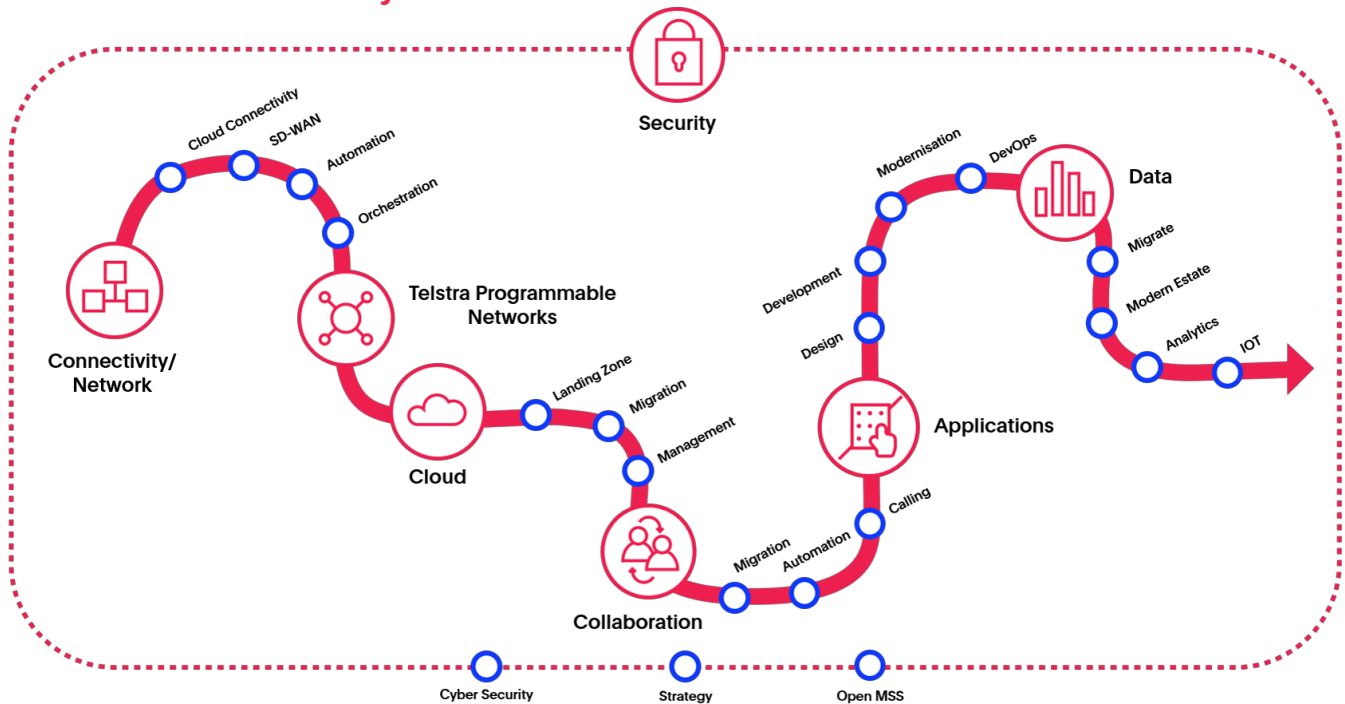

Technology that inspires. Purposefully delivered by experts.

Your business needs are unique - so the solution you need to achieve outcomes is, too. Our experts orchestrate technology into a solution that's purpose-built for your requirements. We believe leadership starts by putting people and purpose at the centre. Bring together your experts with ours and harness the power of technology across the spectrum.

Our Approach

Your Transformation Journey

Security Capabilities

Providing customers with expert and regional resources to help them understand, manage and mitigate risk. This can range from security strategy, design and deployment, policy compliance to operational managed services, all tailored to your required outcomes.

Our Security Capabilities

Cyber Security Advisory

Assess and advise customers on their current cyber security posture, their exposure to online threats based on pre-defined requirements and then provide a customised report of risks identified, vulnerability ratings and the steps they can take to improve organisational security as well as ensuring industry standards compliance.

Solution Services

Assist with selecting and scoping security services, solutions and products appropriately, and provide professional services to help the customer get setup and operating by taking an outcome driven approach.

Managed Security Services

Managed Security Service (MSS) enables automatic detection and remediation of threats with an increased action-oriented insight and scalability, with the capability to align with existing business models. Ideal for organisations that don't have a full-time security team.

The security capabilities have been designed to enable organisations of all sizes to focus on their core business successes and enable highly trained and experienced consultants and engineers to manage their security demands

Cyber Security Advisory, Solution Services, Managed Security Services

Security Services Capabilities

Benefits

Expertise

Global team of qualified security experts across all industries with a strong reputation of best-in-class delivery and a leader in providing the security solutions

Valuable Technical Security

Implementation of technical security controls aligned to business requirements and policies to ensure appropriate protection

Promote Security Culture

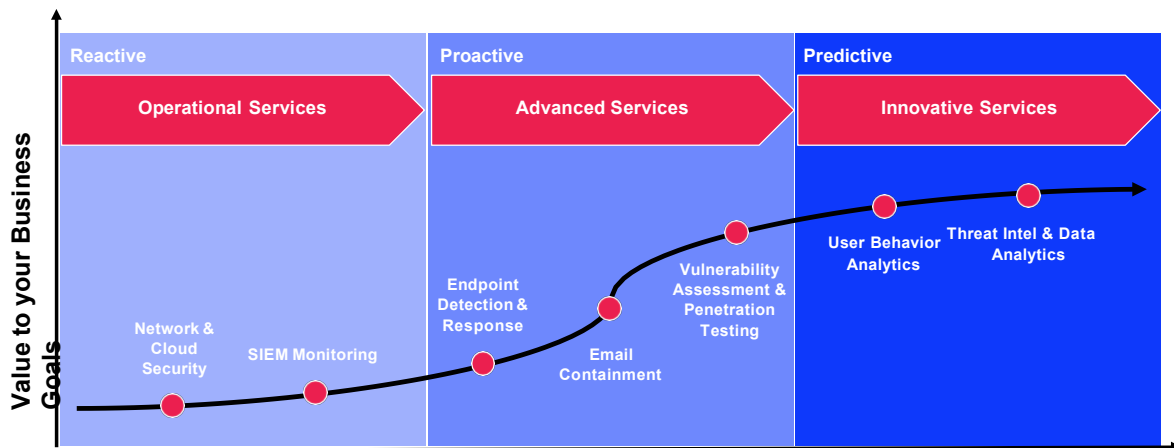

Make security more robust at all enterprise levels across people, processes and technology elements to manage the evolving risks and threats

Mitigate Business Risk

Achieve compliance with established security frameworks to ensure risk is regularly reviewed and appropriately managed/mitigated

Journey to Security Maturity

Use Case

Security And Threat Assessment

Problem: A leading global ports group was looking to implement SD-WAN infrastructure in their environment and required a security assessment to reduce the possibility of any cyber security attacks, system breaches and disclosure of confidential information.

Solution: Combination of internal and external Vulnerability Assessment and Penetration Testing (VAPT) was performed on the agreed in-scope assets of group and additional penetration testing on an external web application infrastructure with an option for re-test to ensure customer have resolved the identified findings. The results of the test are presented in a customised report detailing risks, vulnerability ratings and recommendations.

Outcomes: Risk reduced through prioritised remediation of vulnerabilities discovered in the environment.
