

# Connecting Telstra International channel partners to new opportunities in Asia

## About Telstra International

Connections matter at Telstra International. Our robust infrastructure, professional expertise and 70+ years of heritage are dedicated to bringing people and their ambitions together. Seamlessly, efficiently, reliably.

## Your connectivity partner to Asia

We bridge the West, Asia, and global markets as your trusted connectivity partner, delivering seamless digital infrastructure for connections that matter.

### No. 1 Carrier Connecting US to Asia

Let your customers connect on one of Asia's largest and most diverse subsea network

### Connectivity

3 wholly owned cable systems, plus access to >30 cable systems, 38 cable landing stations and 3 world-class teleports

### Opportunity

Diverse subsea connections between major Asian business capitals like Singapore, Hong Kong and Japan

### Expansion

600+ owned, operated or partner-operated data centres integrated across the globe

### Strategic Investment

Continued cable investment within Asia Pacific and connecting to US

### Assurance

Over 70 years of multi award-winning excellence in international operations

### Access

Network access extends to >250,000 miles of cable length

### Reach

Connectivity through PoPs in close to 200 countries and territories

## We operate industry-leading network built on a highly resilient framework for secure connectivity, ideal for mission-critical applications

Our infrastructure is built for scale, resilience, and performance. Our network provides access to capacity on key routes in some of the fastest growing markets in the world. We can deliver seamless connectivity over international fibre optic submarine cables that is highly scalable to meet your needs. Our extensive range of routing options includes:

### Global Backbone

- Ethernet Private Line (EPL)
- EPL Express
- IP Transit

### WAN Underlay

- Virtual Private Network (IPVPN, EVPN)
- Global Internet (GID/GIE)

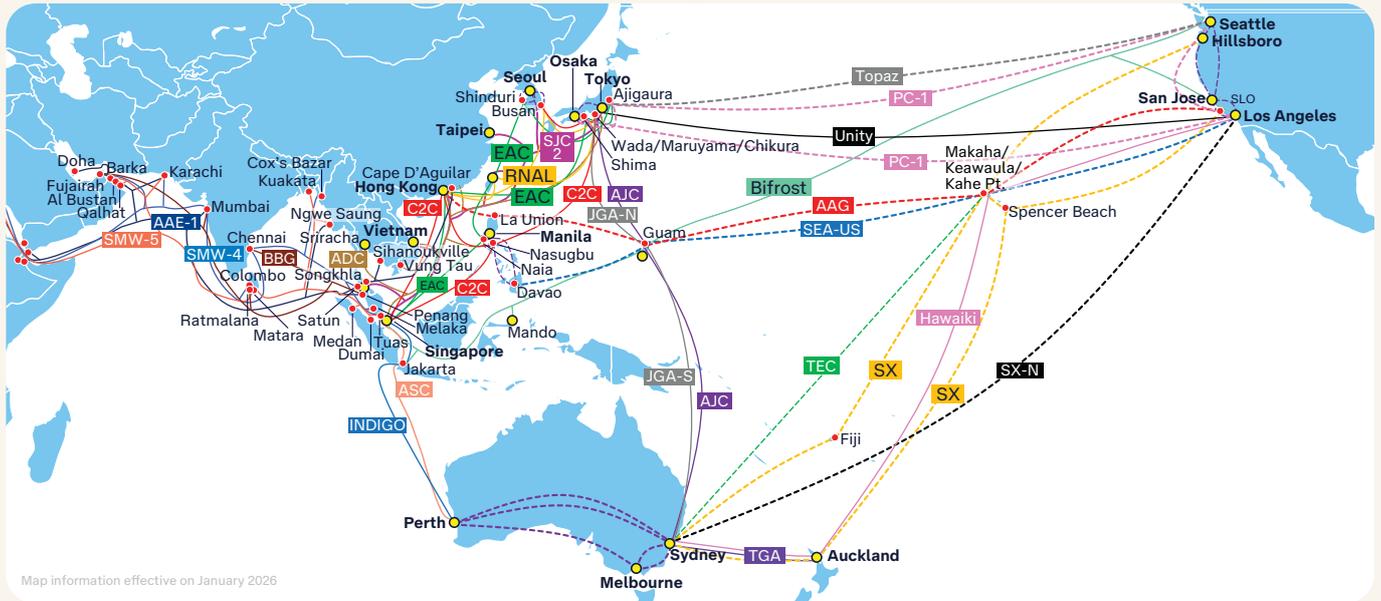

### Cloud Connectivity

- Public Peering
- Hosted Connectivity
- Dedicated Private Connections

# Make our network your network, connecting the West, Asia and the world

Our Trans-Pacific and Intra Asia subsea routes connect your business into Asia

## Extensive network and capabilities in China and India

### Connecting to China via Telstra PBS

Telstra International's scale and expertise make us your trusted route into mainland China, where we have operated for over 16 years. We are the first foreign company licensed to provide connectivity and data centre services in mainland China through our Telstra PBS joint venture and have been building network and data centres at scale for over a decade.

We have the ability to operate data networks in:

- 35 key cities
- 15 carrier-neutral data centres in mainland China

### Telstra PBS coverage

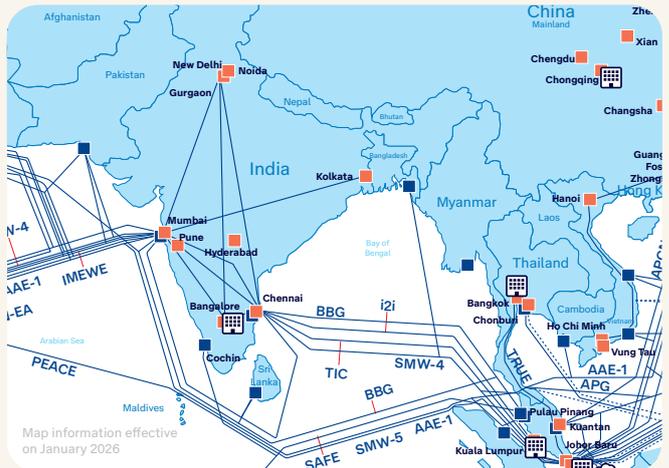

### Connecting to India with IP Transit

With our massively scalable and diverse Asia Pacific network, we help you to reach the world's most populous country seamlessly.

We deliver licensed, enterprise-grade connectivity on a dual-core architecture with express routes to eight global geographies. Our eight resilient cable routes between India, Asia and Europe ensure nationwide reach and stable performance even in multiple cable-failure scenarios.

- Internet PoPs across all of APAC
- In-region highly scalable cloud/carrier connectivity
- Interconnection to other major global hubs (Europe, US)
